

# Burlington High School

## Description of Phases

Green days are considered to be the closest to normal instruction BHS can provide at this time.

Yellow days will be used as an increased effort to slow the spread of the virus due to a direct threat in the community.

Red days will be result from an order to close the school because of COVID incidence in the building or community by the local Health Department or by order of the Governor.

## Criteria

Green days are the lowest risk days of COVID as determined by the district and the Kit Carson County Health Department. There are no obvious health issues in the school community. An ill student or parent may need to be tested for COVID-19, but there is still low risk to the school population.

Yellow days are times and periods in which there is an observed and verified increase in COVID-19 cases in our community. This would be people who have been exposed or tested positive in the school system, parents/siblings who have tested positive, etc.

Red days are when large community outbreaks require Health Department or Governor ordered school closures. School may be out for a short time and then students on a very limited basis will be allowed to come back to school for support in groups.

## Screening

Employees will be required to screen for temperature and any other type of illness prior to coming to work. Parents will be expected to screen from home before sending kids to school. The district will provide educational material regarding pre-screenings. Employees and students will have temperatures checked before the start of the school day and as needed per normal school procedures. All adult visitors will be screened.

Same as above except screening may increase to twice a day (before school and lunch/recess). Staff will implement heightened monitoring of student symptoms.

Access to the building will requiring screening.

## Building Access

Access to the building will be closely controlled and monitored. Outside entities will complete screening at the office and access will be limited to help manage cohorts and cleaning. Parent/community volunteers may still be allowed access to the building.
Staff access will continue to be monitored. Student access may be reduced to limit the number in the building.
Staff will have building access. Student access will be very limited.

## Instruction

Students will experience normal learning in the classrooms. Students will receive direct instruction from teachers and paraprofessionals. Feasible social distancing will be exercised when possible and some classes will be relocated outdoors weather allows. Teachers may modify some activities as they see fit to best support health guidelines. Teachers will prioritize using Google Classroom or Colorado Digital Learning System (CDLS) technology within the classroom.
Student access to BHS may be reduced, requiring the use of Google Classroom or CDLS technology.
Instruction will be online.

## Extracurricular/Before/After School

Activities will be offered as possible.
Extracurricular activities will be suspended for quarantined students.
No activities.

## Cleaning and Sanitation Procedures

High touch surfaces such as doors, desks, and common areas in classrooms will be wiped down frequently throughout the day. Frequent handwashing will be encouraged. Custodial staff will sanitize high use areas regularly.

## Common Use Areas

### Cafeteria

Students will continue to have open-campus lunch privileges. Students remaining in the commons for lunch will social distance as possible. Tables will be sanitized at the conclusion of the lunch hour.

Students may eat in classrooms as permitted to further distance themselves.

Grab and Go lunches available.

### Gym, Music, Computers

All equipment used in these classes will be sanitized frequently when possible.

Physical Education will be encouraged to select outdoor activities when possible.

Students will be provided materials and training to sanitize student-owned instruments as needed.

### Library

Students will use social distancing in the library. The librarian will monitor for sanitizing needs in this space.
